SNAP-QCS 380 Variable Length Format Upload Guide

Database Version: 10.18

Generated Date: 11/28/2026

Introduction

The original 380-1 upload file is a fixed 80 column text format file for state to upload active or negative cases to SNAP-QCS system. With the arrival of 380 form, the number of fields reach to 1000 level and the original 80 column format doesn't serve well. The solution is a free variable length xml format upload schema. The current user guide provides detailed description for the new format.

Variable Length Upload File Format

The new variable length upload file format is a combination of fixed and free format: the first and last rows of the upload file declare the case type and trailer respectively. In between are the cases information (single or multiple cases). For each case, its first row is always the review number, following with multiple fieldId and value pairs.

$caseType	Header row
reviewNo {fieldId}fieldvalue{fieldId}fieldvalue {fieldId:rowidx}fieldvalue {fieldId}fieldvalue{fieldId}fieldvalue {fieldId:rowidx}fieldvalue reviewNo {fieldId}fieldvalue{fieldId}fieldvalue {fieldId:rowidx}fieldvalue {fieldId}fieldvalue{fieldId}fieldvalue {fieldId:rowidx}fieldvalue …	Data rows
$TRAIL$fiscalYear$stateFips$stateName$reviewCount	Footer row

$caseType	Must be in the first row and start with $. The value can be "$Active" or "$Negative"
reviewNo	6 digits in a single row
{fieldId}	Unique field id across all forms(245,380-1,380) - see additional tabs in Excel. It must be inside { and }.
{fieldid:rowidx}	If the field is in the list, rowIdx is required. The rowIdx starts with ':'. It can be 0 to 99. See remarks for further requirements.
fieldvalue	The data value of the field For multiple selection fields, the codes will be separated by ','. (ex: 01,04,06)

	For free text fields, the characters below need to be escaped (use a \ before using the characters below. ex: { should be \{) New line: \n { : \{ \ : | |
$TRAIL	Identify this as the last row of the file
$fiscalYear	Must be 4 digits. Starts with $ and begins right after $TRAIL.
$stateFips	Must be 2 digits. State FIPS code starts with $ and begins right after $fiscalYear.
$stateName	State name can be full name or short name.
$reviewCount	The actual count of reviews in the file.
$rowCount	The count of the rows in the file, including header and trail rows.

Remarks:

a. One upload file can only contain reviews of one case type, one fiscal year and one state

b. The upload file must have header row as the 1st row and 1 trail row at the end of the file

c. All data rows must start with the 6 digit review number row

d. The review data for one review can cross multiple rows

e. Long text fields (all Narrative fields in 380 and Section V in 245) can be split into multiple field instances. The system will connect them all together.

f. Every field instance contains a {fieldid} and field value. If there is no value, the fieldId is not required.

g. If the field id is not defined in SNQP-QCS, or it has been retired, the field value will be ignored without generating an error.

h. Fields can be in any order.

i. A field's total length cannot exceed the max length defined in additional tabs found in this excel workbook

j. Extended list must use the same rowIdx as the master list.

k. Extended list is a list extended from master list. See below:

Master List: Section B
Extended List: 110, 111, 130, 151, 160, 161, 162, 163, 166, 170,

Extended list must use the same rowIdx as the master list. This ensures the same person in Extended List as in Master List, e.g: When Section B has 2 people with rowIndx 0, 1, the part from upload file will be like:

`{380.B.PersonNumber:0}01{380.B.PersonNumber:1}02`

Then in 110, 111……and all the elements, the rowIdx will only be 0 or 1 like:

`{380.110R.DocUsed:0}dd{380.111R.PersonNumber:0}01`

Please be noticed that `{380.111R.PersonNumber:7}02` is wrong since no such person can be found in Section B.

The following is a sample upload file:

```
$Negative
012345
```

```
{245.C}012{245.D}201211{245.I}1
{245.L}1{245.Ma}1{245.N}1
{245.V}this is a text line1\nthis is text line2\n …
{245.V}this is the last testing line
012346
…
$TRAIL$2013$42$PENNSYLVANIA$2
```

Upload File Sanity Error Code

Code	Message
SC010	Review Number must be 6 digits number
SC020	Duplicated Review Number in file
SC030	Duplicated Field ID in one review
SC040	State Code in the upload file does not match the state for which you have rights
SC050	Sample month in File does not match Selected Sample Year
SC060	Header Not Properly Formatted or Positioned Incorrectly
SC070	Trailer Not Properly Formatted or Positioned Incorrectly
SC080	Incorrect State Code in Trailer
SC090	Inaccurate Case Count in Trailer
SC100	Improper non-numeric character in file
SC110	Improper data length in file
SC120	More than 8 Detailed Error Findings in Section 2
SC130	More than 16 Persons Listed in Section B
SC140	More than 10 Persons Listed in Section C
SC150	More than 10 Persons Listed in Section 5
SC160	The Person Number in Section 5 must exists in Section B
SC170	Modifying protected fields after Federal Sample or Federal Case Sign-Off
SC999	Other errors
